

Job Specification.

Senior Consultant, Consultancy Team.

Headline Information.

Salary: Competitive
Role: Full Time role (Hybrid)
Location: London Bridge, SE1

About Syzygy.

At Syzygy, we're Europe's leading green tech consultancy, bridging the gap between the commercial real estate sector and innovative low-carbon solutions. Our mission is to empower businesses to accelerate their journey toward Net Zero Carbon by embracing embedded technologies that deliver measurable impact. We specialize in renewable energy, energy storage, and EV infrastructure, trusted by major clients such as abrdn, Segro, GLP, British Land, and Landsec. Our team combines technical excellence with strategic insight to deliver solutions that align sustainability goals with commercial realities.

Our vision is clear: to energize our clients to harness the power of green technologies in the fight against climate change. With over 1,500 transformative projects delivered and assets managed to optimize energy performance, we don't just talk about making a difference - we deliver. From rooftop solar arrays to batteries and EV charging infrastructure, every project is tailored to decarbonize the built environment while adding tangible value. Join us in shaping a cleaner, greener future.

What do we do?

Consultancy: We provide expert guidance across all our technology domains, offering tailored solutions to meet client needs. Our services include:

- Strategic holistic energy advice to drive informed decision-making.
- Comprehensive review and optimization of real estate portfolios.
- Feasibility studies and robust business case development.
- Creation of innovative products and services to stay ahead in the market.

Our other teams:

Project and Programme Delivery: When a client has decided they wish to push forward with a project we look after everything associated with delivering that project apart from physically constructing it. So, working with the grid, planning, design, specification, running a construction tender and managing the project through the construction process. For many clients, we also provide Programme Management services, managing the delivery of multiple projects and workstreams.

Asset Management: We monitor and manage almost 200 constructed projects (Solar PV and EV charging infrastructure) to ensure they perform to expectations and the client has the financial reporting they need.

The Role.

The Senior Consultant role is a leadership and output focused position within the Consultancy Team at Syzygy. Syzygy's Consultancy Team is the beating heart of everything we do, understanding, defining and analysing the best decarbonisation solutions for our clients. As a Senior Consultant, you will be central to leading and reviewing key deliverables for the team, enabling the team to deliver exceptional service to our clients. You will also be driving the development of new and existing innovative products and services, in our quest to be the leading embedded green tech consultancy in Europe.

Expertise of commercial real estate and renewable energy generation technologies is required. As a Senior Consultant, you will lead and QA the delivery of high-quality feasibility studies and portfolio reviews, directly supporting our ADs on both technical and operational project requirements. You will also be taking ownership of key complex strategic projects, including holistic energy strategies, multiple technology solutions, and smart grid problem-solving. Knowledge of the energy market value chain, grid connections, and the evolving EV, battery storage, and smart grid landscape is highly beneficial. Experience or familiarity with heat networks and modelling is also welcomed.

The successful candidate must have strong client-facing skills, as Senior Consultants are expected to confidently present their work to clients and address questions, with Senior/leadership support as needed. You will also support our Business Development team with pre-sales presentations and pitches and you will be expected to draft proposals to secure new instructions. Clear communication with senior staff is essential to ensure ideas are effectively conveyed. An excellent team ethic and strong time management is key to meeting client deadlines while maintaining the required level of detail and quality.

Key responsibilities, to include:

- Take ownership and work collaboratively with colleagues within the Consultancy team and across the business to grow and develop our financial and commercial models, data analytics, methodology and processes to maintain a leading edge and USP in the market.
- Lead the development of new and existing products and processes for both UK and EU projects.
- Support the business development function within the business by providing technical expertise to present to our key clients and produce proposals to secure new instructions.
- Guide the team and QA feasibility studies which include technology layouts, analytics, project lifecycle and delivering clear and concise reports with key finding and recommendations.
- Lead and deliver strategic consultancy work which includes multiple technology solutions and working with multiple stakeholders.
- Mentoring junior team members, sharing expertise, and fostering professional growth within the team.
- Take ownership to ensure our activities and deliverables are completed on time to high quality standards, best practice commercial risk management has been taken

into account and be able to communicate views and findings to colleagues, management and clients.

- Follow Syzygy's internal process and systems, taking care to ensure compliance with all corporate policies and objectives.
- Willingness to be flexible and adjust to changing conditions and be a team player who builds trust and a reputation.

Reporting.

The post holder will be reporting to a senior team member within the Consultancy Team for daily guidance and support, with overall accountability to the Team Lead.

Requirements for the Role.

Essential.

- A degree in engineering, maths, science, energy, environmental science, or related.
- Past experience with the above responsibilities.
- A passion for sustainability and innovation.
- Ability to work within the UK.

Advantageous – not required.

- 5+ years' experience in the renewables or energy sector.
- Ability to speak one or more European languages.
- Experience of working in EU countries.

If you don't tick every box, don't hesitate to apply. We'd love to explore how your experience aligns with this role or other opportunities within our team.

The Package.

- 40 hours per week with our core hours being 10:30am – 3:30pm
- Hybrid working with a minimum 3 days in the office
- Up to 5% matched pension contribution
- Bike to work scheme & Tech Scheme
- London based (London Bridge area)
- 25 days holiday in addition to public holidays
- Holiday buy back scheme, up to 5 days per annum
- Aviva Health Care
- Car scheme

Equal Opportunities.

Syzygy Consulting is an equal opportunities employer. We value diversity, we're striving to be highly inclusive and are committed to promoting diversity in everything we do!

We believe that equality, diversity, and inclusion is what helps us create an environment where everyone can achieve their full potential and feels included and valued for their unique characteristics, skills and abilities they bring to the team.
